

FRIENDS DON'T LET FRIENDS DIE!

Dear Friends:

You may have noticed that some of your peers suddenly didn't show up in class. Later, you might have heard that they overdosed, and you lost your friend to drugs.

Some of you were at the same party, in the same house, just chilling while your friend needed help desperately.

What would you do if you were in the presence of a friend who was overdosing?? Or was suffering from alcohol poisoning? Or was beaten by another friend and needed help? What would you do?

When you call yourself a true friend....BE ONE!!!!!!!!!!!!

FRIENDS DON'T LET FRIENDS DIE, NO MATTER WHAT!!!!

Yes, that's right! A TRUE FRIEND calls 911 and helps save a life!

If you're a friend, you're responsible for that friend, NO MATTER WHAT!! Did you know that there are severe law enforcement consequences if you were present, witnessing a friend in a life-threatening situation and you did not call 911?

You help this friend! You look after this friend, NO MATTER WHAT!

Failing to help this friend in his/her most dire time of need could result in the death of this friend.

What kind of friend would you like to be? What kind of friend would you hope to have in the same room with you in your most dire time of need?

Friends are rare and last a lifetime.

Wouldn't you try to save their life?

To see the true, tragic, senseless deaths (just because "a friend" elected not to call 911), visit www.friendsdontletfriendsdie.com. I hope none of your friends are featured there.

Sincerely,
A Friend
